

Diego Fernando Peña López, Deputy Director for Disaster Risk Knowledge and Reduction at Administrative Department of Disaster Risk Management of Medellín (DAGRDR Medellín)

Diego Fernando Peña López is a Geologist from Universidad de Caldas with a specialization in Disaster Prevention, Attention, and Risk Reduction from Universidad Católica de Manizales. He brings more than 20 years of experience leading and coordinating initiatives in integrated disaster risk management, climate resilience, territorial planning, and public policy formulation across national, regional, and municipal entities—such as UNGRD, IDIGER, and the Metropolitan Area of the Aburrá Valley. Currently, he serves as Deputy Director for Disaster Risk Knowledge and Reduction at DAGRD Medellín, leading technical strategies and inter-institutional coordination to strengthen urban resilience, flood risk mitigation, and informed decision-making.
