Dr. Judith Gobin, Professor of Marine Biology and Marine Science and Policy Adviser

Dr. Judith Gobin is a distinguished Marine Ecologist and Professor of Marine Sciences with over 4 decades of expertise in: marine benthic biodiversity, ocean governance, and sustainable development. Prof. Gobin, pioneered marine biodiversity research in Trinidad and Tobago. With over 75 scientific publications, her research has contributed significantly to understanding the structure, function, and resilience of marine ecosystems in the Caribbean and the wider Atlantic. Professor Gobin is a regional and international leader in ocean governance and currently serves as a technical expert, supporting and helping Small Island Developing States (SIDS) align their national priorities with global ocean governance commitments. Through her combined scientific authority and policy expertise, she plays a pivotal role in bridging the gap between research and decision-making. She is a champion for the sustainable use of ocean resources for the benefit of the Caribbean and SIDS societies, and future generations.
